605 v.83, 1939

POWER

McGraw-Hill Publishing Co., Inc., 330 West 42nd St., New York, N. Y.

GENERAL INDEX TO VOLUME 83
JANUARY–DECEMBER, 1939

January	Pages 1–60
February	" 61–122
March	" 123–184
April	" 185–252
May	" 253–314
June	" 315–384
July	" 385–448
August	" 449–516
September	" 517–586
October	" 587–654
November	" 655–724
December	" 725–792
Mid-December	" 793–852

A

ACCIDENTS AND ACCIDENT PREVENTION Page

Chemical manufacturer guards against acid burns. O. M. Roberts..... 175
Double locks on elevator doors. Frank Schleiff *427
Feedwater chemicals handled safely. S. H. Coleman.....*770
How to apply artificial respiration.*639, *709
Lighting unit protected from breakage. Alex Irwin.....*769
Practical pointers on artificial respiration. George Edwards..... 707
Safety rules for tanks, boilers. S. H. Coleman 51
Segregation of switching equipment means reliability and fire protection (A.I.E.E. meeting) *165

AIR COMPRESSORS

Asbestos sheet gaskets. F. E. Davenport *189
How to hang up your compressed-air receivers. H. M. Spring.....*350
Indicator diagrams—air and gas compressors (Power's Data Sheets).....*577
New and improved equipment reviewed 798

AIR CONDITIONING

California building heated by reversed cycle refrigeration *215
Chemical promises sure death for slime and algae. Nason & Fleming..... *91
Controlling slime in air-conditioning systems by silver electrodes. James Shearer *396
Fire protection for air conditioning. N. D. Sherwood.....*480
How ammonia can be used in comfort air conditioning. R. S. Munford.....*664
Industrial Rayon's new plant is air-conditioned in all departments..*150, *155
New and improved equipment reviewed 801–803
Research holds attention of air-conditioning engineers 166
Sheffield Farms milk plant combines refrigeration, power, heating and process steam in an unusual way..... *22
Steam air moistener. H. A. F. Campbell *360
Sugar plant conditioned by adjustable air nozzles. Newt Smith.....*769
Air ejectors are replacing outmoded air pumps. J. P. Lidiak.....*464
American Boiler Manufacturers Assn. and Allied Industries
Hershey, Pa. meeting..... 437
American Institute of Electrical Engineers
New York meeting.....*165
Scranton meeting 711
American Institute of Mining and Metallurgical Engineers and American Society of Mechanical Engineers Fuels and Coal Divisions meet.....*684
American Society of Heating & Ventilating Engineers — Meeting in Pittsburgh 166
American Society of Mechanical Engineers—Highlights and awards at 60th annual meeting *839
National meeting of the Oil and Gas Power Division *482
New Orleans meeting.....*230
San Francisco meeting.....*531
60th annual meeting report.....*829
American Society of Refrigerating Engineers—Hershey, Pa. meeting..... 435
Appalachian Coals conference..... 108
Apprentices needed. P. W. Swain.....*765
Argument corner 365, 431, 499, 569, 637, 707, 776
Ash handling .....*74, (Ed) 61, *74
Ash handling—bunkers and silos..... *77

B

Page

Bearings—Selecting bearings and hangers for line-shaft drives. C. A. Decker..*148

BELTS

Aligning line shafting. H. W. Benton. 58a
Belt flexing *233
Don't get the "creeps".....*698
How to splice two-ply leather belts....*571
Leather belt maintenance at Walk-Over plant *357
Locating V-belts on wide sheaves. C. C. Lynde *176
Quarter-turn belt solves difficult drive. H. M. Perry.....*768
Short-center belts also sweet running. Robert Sharp *569
Using pivoted motor bases to obtain good belt tension. J. R. Hopkins.... *42
Yardstick for new standards in selecting leather belts. L. H. Skougor.....*401
Bituminous Coal Research — Research Committee meeting 299

BOILERS

Arches for flat-flame burners. J. O. G. Gibbons *637
Ash handling *74
Bark-burning furnaces for pulp and paper mills *274
Boiler-house accessibility. Joseph Elman *104
Boiler inspectors. E. R. Webber..... 58c
Bunker-spout changes eliminate coal fires. George Bell.....*113
Buying a second hand boiler. H. M. Spring *561
Bypass simplifies strainer cleaner. C. R. Anderson *306
Carryover. Parkinson, O'Regan, Brodsky, Carter, Brown, Hudson, Porter, Mullen 296
Coal-handling systems *62
Coal weighing *72
Comparing boiler performances (A.S.M.E. meeting) 836
Compounds in boilers. Gibbons, Estlick, Markland, Spring, Kiely, Kirk.. 634
Condenser for evaporator. Martin, Wherritt, Stevens 167
Construction of boilers nears 1937 level.789a
Cooling oily drips. Brill, Farrugia, Gorrie, McNally, McCallum, Brodsky.... 635
Denver & Rio Grande Railroad gets smokeless steam in shop. Durbin Van Law *162
Dominion Steel & Coal devises plan for quick change of induced-draft-fan rotor *139
Don't drop a boiler. A. C. Wiggins..... 240
Draft-gage indicates boiler room pressure. H. P. King..... 241
Essex Station boiler house (picture feature) 33
Essex Station's operating experience with 1250 lb. 950 F top..... *92
Firing doors 167
Firetube boilers. Harry Spring..... 367
Furnaces studied with cameras by A.S.M.E. and A.I.M.M.E. meeting.....*684
Gulf States Utilities, Baton Rouge, uses extra boiler insulation for comfort. A. L. Sargent *522
Heating-coils return. Gibbons, Estlick, Hardie, Avant, Yeo, LeQuesne, Chamberlain, Gorrie, Rea, Bachmann, Korab, Matthes *704
Height for the water column. C. W. Carter, Jr. 499
High-pressure boiler problems. M. H. Kuhner *160
Huettner rotative boiler turbine.....*527
Hydraulic couplings control boiler feed-pump speed. Harold Sinclair.....*528
Ins and outs of boiler outage. S. H. Coleman 88
Instability in boilers. H. M. Spring....*613
Insurance data on boilers..... 299
Jet condenser without cooling-water pump. J. T. Topolosky.....*112
Kerosene for scale? Gorrie, Carter, McNally, Pate, O'Brien, Spring, Pincus, Blum, Coleman, Dietrich..... 566
Klaxon signal system connects engine and boiler rooms..... 358
Lansing municipal plant has stackless boiler house *588
Leaking tubes. McNally, Chamberlain, Spring, Todd, Porter, Mullen..... 429
Leaks in boilers traced with compressed air. J. R. Williams..... 239
Locomotive-type boilers. Harry Spring. 433
Masonite Corp adds more steam with gas-fired boilers *474
New and improved equipment reviewed. 794-797
Oil in boiler water. Kirk, Gorrie, O'Regan, Brodsky, Urba, White..... 363
Orsat on wheels for gas sampling. H. M. Naylor *490
Partial zeolite softening for better boiler water. E. W. Scarritt.....*134
Pictures of boilers to show overhaul....*559
Pressure tank supplies desuperheater water *173
Pulp and paper mills power boilers..... 273
Questions for boiler-room engineers. H. M. Spring.....31, 83, 128, 229, 367, 433, 491, 570, 777
Rebuilt burner orifice improves operation. A. Honore.....*425
Recovery boilers for nine pulp and paper mills *274
Regulator for boiler of oil burner. H. M. Spring *426
Rochester Dairy modernizes with big boiler in small space.....*487
Safe-ending. J. J. Timmons..... 176
Safety rules for tanks, boilers. S. H. Coleman 51
Safety valve spring construction. M. G. Ireland 176
St. Croix Paper Co. changes furnace to slag-top so as to burn local low-grade coal. J. T. Topalosky..... *38
Sears, Roebuck in Chicago installs largest spreader stokers and new boilers. Chapin Roberts *40
Signal system for oil burner insures heating service. A. Honore.....*426
Softener-room log sheet. A. L. Bennett.*563
State Line Generating Stations second unit has reciprocating boiler-feed pump *190
Staybolt replacement saves $10,000. C. D. Reid (McGraw price)..... *7
"Super" boilers designed in Europe.....*749-760
Testing boiler water. T. D. Oswald....*328
Testing dust collectors. J. E. Watson..*668
Trough guide for tube cleaner. H. P. King *112
Vacuum breaker on boiler. R. Boettinger *240
Wallace, R. & Sons Mfg. Co. modernizes with air preheater and other improvements.....*602, pt 2 *695
Water column checking. H. M. Spring.. 637
What happened? Coleman, Brodsky... 58b

BOOK REVIEWS

Air conditioning. J. A. Moyer & R. U. Fittz 120b
Air-conditioning engineers' atlas. Strock & Hotchkiss 583c
Air conditioning, heating and ventilating. J. R. Dalzell & C. L. Hubbard..120c
Applied economics for engineers. Bernard Lester 788b
Arc welding in design, manufacture and construction 503
A.S.T.M. specifications 381a
Atoms in action; the world of creative physics. G. R. Harrison..... 780
Combustion, flames and explosions of gases. Lewis & Von Elbe.....380b
Corrosion of metals. O. P. Watts.....381a
Diesel engineering. J. W. Anderson.... 298
Diesel engines. B. J. Von Bongart..... 298
Diesel engines—theory and design. H. E. Degler 583b
Design of industrial exhaust systems. J. L. Alden..... 573
Directory of New England manufacturers 780
Economics of business enterprise. Walter Rautenstrauch 583a
Electrical year book..... 242
Engineers' manual. R. G. Hudson..... 298
Fan engineering. Ed. by R. D. Madison.312a
Fractional-horsepower electric motors. C. G. Veinott.....120b
Gas analysis. A. McCulloch.....120a
Glass giant of Palomar. D. O. Woodbury 782
Handbook of hydraulics. H. W. King.. 503
Handbook of refrigerating engineering. W. R. Woolrich..... 242
Heat power. Norris & Therkelsen..... 782
Heating and air conditioning. Allen & Walker 780
How to buy, sell and burn coal. T. A. Marsh 573
How to estimate for the building trades 242
How to write better business letters. L. E. Frailey 788a
Industrial architecture. Geo. Nelson... 242
Industrial electricity. C. L. Dawes..... 781
Industrial electricity. Nadon & Gelmine 503
Industrial instruments and charging technology 3801
Know your ropes..... .....381a
Lubricants and lubrication. J. I. Clower 781
Machine design. S. E. Winston..... 573
Maintenance and inspection of steam turbine generating units and auxiliaries. Hans Dahlgrand..... .....120c
Manning formula tables for solving hydraulic problems. H. W. King..... 781

(*) Illustrated. (Ed) Editorial

Page

Manual of ordinances and requirements for smoke prevention..... 782
Manual on cutting of metals.....788b
Modern furnace technology. H. Etherington 583a
My 50 years in engineering. E. A. Hitchcock & Weed..... 780
New booklets and catalogs..837-838, 840-848
Number—the language of science. Tobias Dantzig 583b
Oil-engine power cost report for 1938... 782
Pape-Swift boiler reference book. O. H. Pape 312a
Patent tactics and law. R. S. Hoar.... 298
Piping handbook. Walker & Crocker..514a
Power factor economics. P. L. Rogers.. 298
Practical electric illumination and signal-wiring methods. Terrell Croft... 573
Practical heat. Terrell Croft; rev. by R. B. Purdy..... 298
Problems in mechanics. G. B. Karelitz & others 788c
Public speaking for technical men. S. M. Tucker 781
Rates, taxes, and consumer saving.....381a
Refrigerating data book..... 298
Short-center leather-belt drives.....788c
Short history of the steam engine. H. W. Dickinson 503
Sixth annual report of the Engineers Council for Professional Development.380b
Steam-engine principles and practice. Terrell Croft; rev. by E. J. Tangerman 298
Steam and gas engineering. T. E. Butterfield & others.....120a
Steam and hot-water fittings. W. T. Walters 780
Summer weather data. J. C. Albright.583c
Superheater in modern power plants. D. W. Rudorff 298
Symposium of impact testing.....380b
Textbook for stationary engineers. W. G. Beaver 788a
Theory of mechanical refrigeration. N. R. Sparks 120a
Thermodynamics for chemical engineers. H. G. Weber.....788c
Tool making. C. B. Cole..... 573
Typical monthly bills for electric service.381a
Vayor charts and tables for turbine calculations. Ellenwood & Mackey... 782

C

CABLES

How one engineer gets more life from elevator ropes *675
How to seize wire rope.....*434
Socketing wire rope. George Blum, 776, J. C. Runyon.....*707
Wire rope, how to socket.....*501
Wire rope construction (Power's Data Sheets) 374
Wire rope lubrication. A. J. Morgan...*616
Census—Form for census of equipment.. 779
Census questionnaire (Ed)..... 725
Chimneys—New England hurricane blows down stack but plant keeps going. P. F. Keough..... *17
Repairing cracked chimney. Farrugia, Blum, Mullen, Estlick.....*772

COAL

Belt conveyors for coal handling..... *66
Bunker-spout changes eliminate coal fires. Gordon Bell.....*113
Bunkers and silos for coal and ash handling *77
Coal handling systems..... *62
Coal weighing *72
Conveying oil-treated coal. A. F. Clark.*321
Elevator conveyor for coal handling.... *69
Feeder conveyors for coal handling.... *68
Fuel and ash handling (Ed)..... 61
Fuel selection (A.S.M.E. meeting)..... 831
Fuels that flow..... *78
How about low-fusion coal? C. A. Marshall *736
Portable conveyors for coal handling.... *71
Skip hoists *65
Swinging chute beats hopper segregation. A. K. Spotton..... *28
West End Station of Cincinnati Gas puts in coal conveyor. H. V. Schiefer..... *29
Combustion—A.S.M.E. and A.I.M.M.E. meeting studies furnace "movies"....*684
Combustion made easy. Bill Maddock. 628

CONDENSER

Condenser log mean temperature difference (Power's Data Sheets)..... 36
Daily check on condensers. R. E. Thompson *37
Steam condensers—special section..*201-212

CONTROL

Accessory and supply manufacturers for diesel and gas engines..... 338
Byproduct-power steam-turbine control for paper mills in special conditions. S. H. Henenway.....*462
Dominion Steel & Coal Co. automatically controls two high pressure boilers. A. L. Stewart.....*605
Electronic devices are important to the power engineer. C. T. Pearce.....*610
Essex Station's controls for high pressure units *92
Governor performance discussed at A.S.M.E. meeting *832
Gas-flow control for dust collectors. C. R. Earle *471
How to make and use a water level.....*778
Indicators: Ed on Diesels. K. J. Hellhase *414
Industrial Rayon's new plant is air conditioned in all departments.....*150, *155
Masonite Corp. increases steam by adding gas fired boiler with combustion control *474
Motor controllers lock-stepped. H. W. Betzler *84
Reducing peaks cuts power cost. C. A. Armstrong *174
Sheffield Farms milk plant's control system is centralized..... *22
Signal system for oil burner insures heating service. A. Honore.....*426
Steam sump pump controlled automatically. R. A. Wells.....*631
Sucrest sugar plant saves with combustion control. F. C. Staples.....*196
Water distribution system controlled by special valve. A. L. Bennett.....*175

CONVEYORS

Belt conveyors for coal handling..... *66
Coal-handling systems *62
Elevator conveyors for coal handling... *69
Feeder conveyors for coal handling..... *68
Operating portable conveyors. K. B. Humphrey 771
Portable conveyors for coal handling... *71
Cooling towers—Association of water-cooling tower manufacturers formed..... 713
Sheffield Farms milk plant combines refrigeration, power, heating and process steam in an unusual way..... *22
Corrosion—Metal spray applied to plastics, hard rubber and other materials to fight corrosion. J. W. Gibbons....*194

COSTS AND PERFORMANCES

Broadmoor Hotel, Colorado Springs, know its costs. J. J. Monaghan....*625
Broadmoor Hotel, Colo. puts in new boiler and reduces steam costs. J. J. Monaghan *10
Diesel costs here and abroad.....*163
Essex Station's operating experience with 1250 lb, 950 F top..... *92
Evans & Co. finds that step-by-step improvements cut power costs. A. B. Sullivan *557
Hospital power plants need a doctor! Phil Swain *730
Laundry cuts steam power costs to 37 cents per thousand pounds.....*354
Low-fusion coal sometimes pays. C. A. Marshall *736
Reducing peaks cuts power cost. C. A. Armstrong *174
Staybolt replacement saves $10,000. C. D. Reid (McGraw prize)..... *7
Sucrest sugar plant saves with combustion control. F. C. Staples.....*196
Wallace, R. & Sons Mfg. Co. gains from modernization.....*604, pt 2 *695
What does power cost? H. L. Solberg.. 322
White Haven Sanatorium rebuilds plant, reduces coal consumption 25%).....*286
Will engine pay? Carter, Brodsky, Gibbons, Hardie, Markel, Sauter..... 706

D

Directory of Manufacturers.....
Mid-Dec. adv. 155-212
Dust collectors—see Smoke abatement

E

Edwards, George—Experience 719
Hindsight into foresight..... 377
Horse sense 511
Keep yelling! 787
Lookee here, dam ye!..... 443
Old-fashioned employee relations..... 581
Peace on earth..... 849
Pity the poor peddler..... 311
Playin's safe 649
Right club 57
Spring song 247
Stylish 181
When I am gone..... 119

ELECTRICITY

Application of electric power in the anthracite-coal industry considered at A.I.E.E. meeting 711
Armature insulation faults. A. C. Roe.*198
Buffalo sewage-treatment plant has large capacity synchronous-motor-driven pumps *129
Carbon-dioxide gas cools large high speed motors. C. S. Merrill.....*390
Colorado aqueduct's pumping motors...*761
Current leak eats hole in cooling coil. M. P. Couto Santos.....*494
Distribution and application of power for nine pulp and paper mills.....*278
Electronic devices are important to the power engineer. C. T. Pearce.....*610
Elevator kept clean by sheet-metal guards around traction sheeve. Frank Schleiff *425
Elevator switches modernized for efficiency. Jackson & Elter.....*560
Emergency lights from control battery. R. H. Sogard..... *50
Escalators, the why and how of.....*397
Field-coil polarity. H. W. Hodgson....*700
Fuel oil temperature maintained by electric heat *530
Generator overloads. Kohl & Shildneck.*729
Great Britain's first bombproof substation *164
Grid protector stops starter burnouts. G. H. Dost.....*633
Heaters in oil baths solve motor-room air filter problem. F. A. Mueller.....*352
Induction motor as an auto-transformer. H. W. Hodgson.....*702
Induction motors in Walk-Over factory operate at 10,250 rpm. F. H. Moore..*359
Iowa farms served by interconnected R.E.A. diesel plants. C. M. Stanley..*186
Light furnished emergency heat. C. R. Anderson *173
Lighting trouble corrected by bell-ringing transformer. W. T. Estlick..... 701
Lost residual. N. L. Rea..... 601
Mercury arc rectifiers considered at A.I.E.E. meeting 711
Meter tubing protected by metal raceway. T. W. Bean.....*113
Motor controllers lock-stepped. H. W. Betzler *84
Motor put on ceiling with stacking machine *492
Motor windings cleared of sulphuric acid. R. O. Cummins..... 700
Motors for shoe stitching. H. A. F. Campbell *426
Motors, switches and other equipment... 815-821
Multi-speed ac motors—how to select and operate. Gordon Fox.....*136
Segregation of switching equipment means reliability and fire protection (A.I.E.E. meeting) *165
Setting DC brushes. C. R. Anderson... 361
Single-phase operation of 3-phase generators. Kohl & Kuyper.....*593
Smoke detector in chimney. C. C. Hermann *493
Solenoid-operated oil switch cured of tripping. Dana Gibson.....*495
Sometimes a job can be too good. H. W. Hodgson 633
Sparking oil ring. Albright, Hudson, Williamson, Hodgson, Oman, Scammon, Porter, Axtell, Lufft..... 428
Speed-up improves elevator operation in 70 story building. William Devaughn.*525
Sticking contactor causes starting trouble. George Blum..... 49
Synchronous motor selection. A. G. Ferries *458
Terminal marking on junction-box covers. William Devaughn.....*702
Test box for elevator maintenance. C. J. Elter *424
Test tags field-coil fault before disturbing winding. J. G. Noest.....*267
Testing field pole polarity.....*356
Testing induction voltage regulators. William Knoll, Jr.....*564
Three-phase plug *358
Transformer changes cut power costs. A. R. Markland..... *49
Trickery causes trouble. H. W. Hodgson 631
Wound-rotor motor coupled to boiler-feed pump controls rate of feedwater. A. E. Beardmore.....*686
X-rays put to work in an industrial plant. C. D. Moriarty.....*220

ELEVATORS

Double locks on elevator doors. Frank Schleiff *427
Elevator conveyors for coal handling....*69
Elevator system phone ring indicated by neon lamp. William Devaughn.....*701
Guards around traction sheeve to keep elevator clean. Frank Schleiff.....*425
How one engineer gets more life from elevator ropes *675
How to choose wire ropes for elevators..*258
New switches for elevators for efficiency. Jackson & Elter.....*560
Rubber mountings cut elevator noises. W. C. Keys.....*306
Speed up improves elevator operation in 70 story building. William Devaughn.*525
Telephone system locates troubles in elevator system. William Devaughn..*630
Test box for elevator maintenance. C. J. Elter *424

ENGINEERS

All need educating. S. H. Coleman....182b
Answer to "just a mechanic." Phil Swain 384c
Are we engineers? H. R. Williams..... 431
Are we engineers? An oiler says no. Lee Mackey 365
Cooperation is the answer. F. H. Van Dyck *569
Engineer's swan song. Charles Armstrong 365
June brings the cadets. R. T. Ellwood.. 263
Mechanical skill is the cornerstone of all engineering (Ed)..... 185
New York City license law for operators 785
No controversy. G. E. W. Hillary..... 431
Principles are old, the practices new. E. J. Duff.....*499
Riding elephants—an American engineer in the Orient. N. L. Rea.....*687
School for engineers. Conway Pierce...*419
School for janitors and engineers. O. A. Anderson *569
School for steam careers.....*237
Training a young man to be an engineer by Stephen Fletcher (Ed)..... 1
Who's an engineer?..... 114
Who's an engineer? Gibbons, Coleman. 52

ENGINES—DIESEL AND GAS

Accessory and supply manufacturers....*338
Bellaire, Mich. hydro plant rejuvenated by diesels *692
Chemical promises sure death for slime and algae. Nason & Fleming..... *91
Connecticut College for Women installs steam-diesel combination *726
Cracked diesel-piston heads repaired. Vreeland Tompkins *766
Diesel costs here and abroad.....*163
Diesel engine runs hot bearings by reversed rotation. M. T. Pate.....*769
Diesel fuels. J. M. Drabelle..... *15
